Re: Response to Omnibus Notice of Apparent Liability for Forfeiture
Lunex Telecom, Inc.
File No. EB-08-TC-4503
NAL/Acct. No. 200932170960
FRN No. 001190294

Dear Secretary Dortch:

Pursuant to §1.51(c)(2) of the Commission's Rules, enclosed herewith please find an original and four (4) copies of the Response to Omnibus Notice of Apparent Liability for Forfeiture of Lunex Telecom, Inc. ("Lunex") in the above-captioned file proceeding.

Pursuant to Ordering Paragraph No. 15 of the Omnibus Notice of Apparent Liability for Forfeiture, a copy of Lunex's Response is today being delivered to the Enforcement Bureau – Telecommunications Consumers Division.

Additionally, a copy of the Response is today being delivered and sent via electronic mail to Marcy Greene, Deputy Chief of the Telecommunications Consumers Division.

MARLENE H. DORTCH, SECRETARY

MARCH 25, 2009

PAGE TWO

For the convenience of the Commission and the Enforcement Bureau, this transmittal letter and Lunex's Response to the Omnibus Notice of Apparent Liability for Forfeiture are also being filed today via ECFS in EB Docket No. 06-36.

To the extent you have any questions concerning this submission, please do not hesitate to contact the undersigned.

Respectfully submitted,

A handwritten signature in cursive script that reads "Catherine M. Hannan".

Catherine M. Hannan
Counsel for Lunex, Inc.

SUMMARY

Lunex Telecom, Inc. ("Lunex" or the "Company"), by undersigned counsel, hereby responds to the Notice of Apparent Liability for forfeiture ("Omnibus NAL") released by the Chief, Federal Communications Commission, Enforcement Bureau, on February 24, 2009. The Omnibus NAL incorporates the above-captioned EB File Number. Through the Omnibus NAL, the Enforcement Bureau lumps Lunex in with more than 600 other entities, each of which is accused of failure to comply, in varying degrees of breach, with the dictates of FCC Rule Section 64.2009(e). Each of the 666 entities listed in Appendix I of Omnibus NAL, including Lunex, is tentatively fined a forfeiture in the amount of \$20,000 for these supposed breaches. As demonstrated by Lunex herein, use of this "omnibus" vehicle to potentially expose more than 600 separate companies to an identical forfeiture, when neither the circumstances applicable to each -- nor the defenses available to each -- could possibly be identical, demonstrates a serious disregard by the Enforcement Bureau of Commission policy and precedent. Use of an "omnibus" NAL in the present circumstances also deprives each of the Appendix I companies of the full measure of due process which the Agency must provide. This deprivation of rights is particularly egregious with respect to any of the 666 Appendix I companies which, like Lunex, are not subject to the §64.2009(e) filing obligation.

Inasmuch as every entity listed on Appendix 1 to the Omnibus NAL has been purportedly contacted by the Enforcement Bureau pursuant to a separate EB File Number, Lunex is not privy to the facts and circumstances involved in the remaining 665 cases. With respect to its own situation, however, Lunex respectfully submits that the totality of the circumstances, which the Bureau is bound by rule and precedent to consider, militate against the imposition of a forfeiture against the Company in any amount. Indeed, in light of the inapplicability of the §64.2009(e) filing obligation to Lunex, cancellation in full of the proposed forfeiture is mandatory. Accordingly, Lunex hereby

respectfully requests that the tentative forfeiture against it pursuant to File No. EB-08-TC-4503 be cancelled in its entirety.

As demonstrated below, Lunex has filed the annual CPNI officer's certification required of certain companies by Rule Section 64.2009(e) for both calendar year 2007 (the focus of the Omnibus NAL) and calendar year 2008. It has done so on a continually voluntary basis for the precise purpose of preventing any detrimental action – such as imposition of a forfeiture – by the Enforcement Bureau. Additionally, the Company has also fully cooperated with the Enforcement Bureau's inquiry into the relevant circumstances of the 2007 §64.2009(e) filing, explaining more than six months ago the reasons why §64.2009(e) does not apply to Lunex. Furthermore, throughout calendar years 2007 and 2008 the Company experienced zero attempts by data brokers to access customer CPNI. Likewise, the Company has received zero customer complaints regarding improper use or disclosure of CPNI. Thus, even if Lunex were within the class of entities required to file a §64.2009(e) annual officer's CPNI Certification (which, as demonstrated herein, it is not), Lunex has caused no harm to the FCC's CPNI policies; nor has the Company damaged any individual through misuse or inadvertent disclosure of CPNI, irrespective of whether an annual officer's certification reached the FCC before or after March 1, 2008. In light of the above, the Enforcement Bureau must cancel the proposed forfeiture against Lunex in its entirety, or at the very minimum reduce the forfeiture to a mere admonishment.

For all the above reasons, Lunex respectfully requests that the Enforcement Bureau dismiss the NAL in its entirety as to Lunex, terminate proceeding File No. EB-08-TC-4503 and cancel the \$20,000 proposed forfeiture against Lunex.

Response of Lunex Telecom, Inc.
To
Notice of Apparent Liability for Forfeiture

I. INTRODUCTION.

Lunex Telecom, Inc. ("Lunex" or the "Company"), by undersigned counsel, hereby responds to the Omnibus Notice of Apparent Liability ("Omnibus NAL") for Forfeiture released by the Chief, Federal Communications Commission, Enforcement Bureau, incorporating in the above-captioned File Number, as well as 665 other discrete matters, on February 24, 2009. In filing this Response to the Omnibus NAL, Lunex does not acquiesce to the procedural ability of the Enforcement Bureau to proceed against the Company by means of an "omnibus" NAL which lumps the Company in with more than 600 other entities. Each of the "Appendix I Companies"¹ is of necessity uniquely impacted by its own circumstances, and each is entitled to fair consideration of those circumstances by the Enforcement Bureau both prior to issuance of a notice of apparent liability and prior to the issuance of any ultimate determination as to the appropriateness of a proposed forfeiture -- after each Respondent has availed itself of the opportunity to respond fully to the specific allegations raised in an NAL.²

¹ In the Matter of Annual CPNI Certification Omnibus Notice of Apparent Liability, File No. See Appendix A (Feb. 24, 2009) ("Omnibus NAL"), ¶ 1.

² 47 C.F.R. §1.80(f).

Accordingly, Lunex will first address the procedural infirmities associated with the Enforcement Bureau's choice of proceeding by means of an "omnibus" NAL. Lunex will thereafter respond to the general allegations raised against itself and the 665 other "Appendix I" companies through the Omnibus NAL. As explained more fully herein, the Enforcement Bureau's conclusions that Lunex violated any Commission rule are erroneous and must be rescinded; the proposed forfeiture against Lunex must be cancelled in its entirety. For the reasons more fully set forth below, Lunex respectfully requests that the Enforcement Bureau dismiss the Omnibus NAL as to Lunex, terminate proceeding File No. EB-08-TC-4503 and cancel in its entirety the proposed \$20,000 forfeiture against Lunex.

II. THE "OMNIBUS" NAL IS A PROCEDURALLY INFIRM MEANS OF ASSESSING FORFEITURES FOR FAILURE TO COMPLY WITH FCC RULE SECTION 64.2009(e).

A. An Omnibus NAL does not provide sufficient due process protections For Lunex or any of the other 665 entities listed in Omnibus NAL Appendix I

As an official agency of the United States government, the FCC is bound to adhere to fundamental principles of due process. The Enforcement Bureau, acting according to delegated authority as it does here, is likewise constrained. The Supreme Court has held that

"Due process, unlike some legal rules, is not a technical concept unrelated to time, place and circumstances. Due process is flexible and calls for such procedure protections as the situation demands."³

Furthermore,

"[I]t is incumbent upon agencies to follow their own procedures. This is so even where the internal procedures are possibly more rigorous than otherwise would be required."⁴

The existing procedures of the FCC do not contemplate an omnibus NAL proceeding in which the Enforcement Bureau attempts to justify the *bona fides* of imposing 666 separate forfeitures,

³ Matthews v. Eldridge, 424 U.S. 319 (1976).

⁴ United States v. Cacaes, 440 U.S. 741, 751 (1979).

based upon 666 separate sets of facts and circumstances, against 666 diverse entities – each of which will have widely varying defenses to the allegations raised. And the Enforcement Bureau’s reminder to each of the 666 Appendix I companies to the effect that each “will have the opportunity to submit further evidence and arguments in response to this NAL”⁵ does not cure the due process shortcomings caused by its choice to proceed by means of a flawed, albeit expedient, “omnibus” document.

The instant Omnibus NAL takes more than 23 pages to do nothing more than list, at Appendix I, name after name of the entities subject to the Omnibus NAL. The Omnibus NAL itself, however, provides a mere 4 sentences which purportedly advise this 23 pages of companies what each has done to warrant a \$20,000 forfeiture:

“In this Omnibus Notice of Apparent Liability for Forfeiture (‘NAL’), we find that the companies listed in Appendix I of this Order (‘the Companies’), by failing to submit an annual customer proprietary network information (‘CPNI’) compliance certificate, have apparently willfully or repeatedly violated section 222 of the Communications Act of 1934, as amended (the ‘Act’), section 64.2009(e) of the Commission’s rules and the Commission’s *Epic CPNI Order*. . . . The companies failed to comply with the annual certification filing requirement and did not file compliance certifications on or before March 1, 2008, for the 2007 calendar year. . . . Each of the Companies failed to submit satisfactory evidence of their timely filing of their annual CPNI certifications. The Bureau has determined that as a result of the Companies’ failure to file annual CPNI certifications, the Companies are in apparent violation of section 222 of the Act, section 64.2009(e) of the Commission’s rules, and the Commission’s *EPIC CPNI Order*.”⁶

Indeed, the totality of the Omnibus NAL consists of a mere 17 paragraphs; 7 of these do nothing more than recite standard ordering paragraph language advising the 666 potentially affected companies the date upon which and to whom payment of the \$20,000 forfeiture should be made. In the remaining 10 paragraphs, the Enforcement Bureau provides a scant 2 paragraphs of

⁵ Omnibus NAL, ¶ 1.

⁶ Id., ¶¶ 1, 4.

background on the FCC's CPNI proceeding (which has spanned more than 13 years) and a single paragraph entitled "discussion" which imposes the 666 lock-step forfeitures.⁷

Lunex respectfully submits that issuance of this single NAL is unlikely to instill in the 666 Appendix I companies a sense that their respective information responses to the Enforcement Bureau were adequately considered by Staff prior to issuance of the Omnibus NAL.⁸ Nor does the situation now confronting the Enforcement Bureau – the necessity of analyzing and considering the various facts and circumstances presented by perhaps as many as 666 Responses to NAL – instill confidence that the Enforcement Bureau has manpower resources sufficient to give those NAL Responses anything other than the short-shrift treatment which Appendix I companies have apparently experienced up to this point.

The Enforcement Bureau's choice to proceed by means of an "omnibus" notice of apparent liability is irreconcilable with the FCC's historic commitment to "protect[] the public and ensure[] the availability of reliable, affordable communications" by considering the totality of the circumstances⁹ and by assessing the degree of harm which has actually resulted from a perceived

⁷ The Omnibus NAL makes abundantly clear that the rich and full history of the CPNI proceeding as a whole has been almost completely ignored, as has the Enforcement Bureau's ethical obligation to diligently investigate matters prior to exercising its enforcement authority.

⁸ As noted earlier, Lunex provided all information necessary to the Enforcement Bureau's consideration of relevant issues more than six months ago. Lunex's submission, along with the Company's 2007 annual Officer's Certification, are appended hereto as Exhibit A. Lunex's position is very clearly set forth in that explanatory response; in light of those relevant facts Lunex should not have been included within the universe of entities subject to a \$20,000 forfeiture with respect to §64.2009(e). Indeed, had the Enforcement Bureau followed up its initial information request, Lunex would have gladly provided the further elaboration, set forth at Sections III and IV following. Lunex would certainly have preferred the opportunity to provide this elaboration, had the Enforcement Bureau deemed it necessary, *prior to* rather than *after* issuance of an NAL.

⁹ See, e.g., U.S. v. Neely, --- F.Supp. 29---, 2009, WL 258886 (January 29, 2009) ("Flexibility to review the totality of circumstances" [is] "reflected in precedent and retained by the FCC in its forfeiture guidelines.")

rule violation.¹⁰ This omnibus decisional mechanism is also inconsistent with the FCC's enunciated policy expressed in the *Forfeiture Policy Statement* that it will continue to exercise its "discretion to look at the individual facts and circumstances surrounding a particular violation."¹¹ It is equally inconsistent with the Small Business Regulatory Enforcement Fairness Act's principle (with which the FCC states its forfeiture rules are in accord) that "warnings, rather than forfeitures . . . may be appropriate in cases involving small businesses".¹² It is further inconsistent with the Commission's "general practice to issue warnings with first time violators . . . this type of violator would receive a forfeiture only after it has violated the Act or rules despite prior warning."¹³

This shift away from Commission precedent as embodied in the *Forfeiture Guidelines Report and Order* and toward the issuance of "omnibus NALs" appears to be of very recent origin. The only other example of an attempt to utilize an "omnibus" proceeding to subject multiple unrelated entities to summary liability appears to be Former Chairman Martin's recent *Omnibus NAL Against Various Companies for Apparent Violations of the Commission's DTV Consumer Education Requirements*.

¹⁰ In the Matter of the Commission's Forfeiture Policy Statement and Amendment of Section 1.80 of the Rules to Incorporate the Forfeiture Guidelines, *Report and Order*, CI Docket No. 95-6, FCC 97-218, ("Forfeiture Policy Statement"), ¶ 20.

¹¹ Id., ¶ 6.

¹² Id., ¶ 51. Lunex, and certainly a number of the other 665 Appendix I companies, satisfies the statutory definition of "small business" ("The SBA has defined a small business for Standard Industrial Classification (SIC) categories for interexchange carriers, toll resellers and prepaid calling card providers of "small if it has 1,500 or fewer employees". In the Matter of Implementation of the Telecommunications Act of 1996: Telecommunications Carriers' Use of Customer Proprietary Network Information and Other Customer Information; IP-Enabled Services, *Report and Order and Further Notice of Proposed Rulemaking*, FCC Rcd. 11275 (2007) ("*IP-Enabled Report and Order*"), ¶¶ 100, 102, 104.)

¹³ Id., ¶ 23. Inasmuch as the annual certification filing set forth in §64.2009(e) was only effective for the first time as of the March 1, 2008 filing, every company impacted by the Omnibus NAL falls within the category of entities which, according to continuing Commission practice, should be subject to no more than a warning here.

Originally scheduled for consideration at the FCC's December 12, 2008 Open Meeting (ultimately cancelled), that omnibus NAL was never considered by the Commission.¹⁴

The Omnibus NAL informs the Appendix I companies that in order to avoid the ripening of the proposed forfeiture into an enforceable debt collectible through government process, "each of the Companies listed in Appendix I" . . . must file "a written statement seeking reduction or cancellation of the proposed forfeiture."¹⁵ Pursuant to FCC Rule §1.80, companies caught up in the Omnibus NAL must take this action within 30 days of the issuance of the Omnibus NAL, *i.e.*, no later than March 26, 2009 (a mere 10 days following the date upon which affected carriers were required to complete the FCC's newly expanded Form 477 filing utilizing, for the first time, the FCC's newly developed on-line filing system, and a mere 5 days prior to the FCC's annual Form 499-A filing).¹⁶ FCC rules also ensure Lunex's right to petition for reconsideration of any NAL decision which may be issued following the Enforcement Bureau's consideration of the facts set

¹⁴ Indeed, the FCC's historic use of any sort of an "omnibus" proceeding has been sparse, to say the least. To Respondent's knowledge, these few departures from a more individualized consideration of facts have not been utilized by the Agency to accomplish a purpose so broad (or so financially detrimental) as the instant NAL, which seeks to impose a significant financial forfeiture on 666 separate entities. (*Sæ, e.g.*, In the Matter of Amendment of Section 73.202(b), Table of Allotments, FM Broadcast Stations (Chariton, Bloomfield, and Mecher, Iowa), MM Docket No. 89-264, 1992) (omnibus notice of proposed rulemaking); In the Matter of Review of the Technical Assignment Criteria for the AM Broadcast Services, MM Docket No. 87-267 (1990) (omnibus notice of inquiry); In the Matter of Amendments of Part 73 of the Rules to Provide for an Additional FM State Class (Class C3) and to Increase the Maximum Transmitting Power for Class A FM Stations, MM docket No. 88-357 (1989) (omnibus notice); In the matter of Amendment of the Commission's rules Regarding the Modification of FM and Television Station Licensee, MM Docket No. 83-1148 (1984) (omnibus notice); and In the Matter of Modification of FM Broadcast Station Rules to Increase the Availability of Commercial FM Broadcast Assignments, BC Docket No. 80-90 (1984) (omnibus notice).

¹⁵ Omnibus NAL, ¶ 13.

¹⁶ 47 C.F.R. § 1.80. This timing is most unfortunate, requiring respondent entities to take away much-needed resources from these other administrative functions; it is perhaps unavoidable, however, given that the FCC's NAL rules would have prevented the issuance of an NAL against any entity (even one which might have no defenses available to the allegations) if the Enforcement Bureau had delayed even a few days longer before issuing the Omnibus NAL. *Sæ, e.g.*, 47 U.S.C. §503(b)(6) ("No forfeiture penalty shall be determined or imposed against any person under this subsection if . . . the violation charged occurred more than one year prior to the date of issuance of the . . . notice of apparent liability.")

forth in this Response and, if necessary, to seek further vindication of its rights before the courts. Lunex is confident that these further actions will not become necessary.

Unfortunately for the Enforcement Bureau, however, the bare existence of continuing rights to press for a legitimate factual and equitable review of circumstances at a later date cannot diminish the negative impact of the Omnibus NAL upon the Appendix I companies, required in the here-and-now to respond to allegations which should never have been raised in the first place:

“[L]ong-settled principles that rules promulgated by a federal agency, which regulate the rights and interests of others [must be] ‘premised on fundamental notions of fair play underlie the concept of due process.’”¹⁷

Such fundamental notions of fair play are not present within the context of the Omnibus NAL, for as the United States Court of Appeals for the District of Columbia Circuit has noted, “the mere existence of a safety valve does not cure an irrational rule”.¹⁸ The mere possibility that Lunex will ultimately be vindicated at some future date cannot offset the impact of the Hobson’s Choice confronting it today: the need to expend manpower and financial resources to defend itself against the ill-considered, cookie-cutter allegations set forth in the Omnibus NAL vs. the certainty of financial harm (and FCC “red-lighting”) if no defense is mounted.¹⁹

As the Enforcement Bureau is aware,

“While agency expertise deserves deference, it deserves deference only when it is exercised; no deference is due when an agency has stopped shy of carefully considering the disputed facts.” Cities of Carlisle and Neola, 741 F.2d at 443.”²⁰

¹⁷ Montilla v. I.N.S., 926 F.2d 162, 166-167 (2nd Cir. 1991).

¹⁸ See Icore, Inc. v. FCC, 985 F.2d 1075, 1080 (D.C. Cir. 1993); ALLTEL Corp. v. FCC, 838 F.2d 551, 561 (D.C. Cir. 1988).

¹⁹ Lunex is keenly aware – as should be the Enforcement Bureau -- that the harm would be all the more severe in the case of a small entity caught up in Appendix I which is presently without sufficient funds to mount the required defense within the 30-day filing window. Indeed, the necessity of filing the instant Response is impacting Lunex’s financial situation, yet the pendency of the Omnibus NAL ensures that the Company has no realistic opportunity to do otherwise.

²⁰ Achernar Broadcasting Co. v. FCC, 62 F.3d 1441, 1447 (1995).

And as more fully explained infra., the Enforcement Bureau clearly failed to consider the disputed facts explained by Lunex in its LOI response more than six months ago. Thus, wholly apart from its unexplained departure from Commission precedent (which would have resulted in nothing more than a warning to Lunex and the 665 other entities named in Appendix I) the Enforcement Bureau has failed to satisfactorily perform the type of investigation upon which a proposed forfeiture might withstand due process scrutiny. The due process concerns presented by the Omnibus NAL, however, do not end there.

As the Omnibus NAL notes, “[t]he Bureau sent Letters of Inquiry (‘LOIs’) to the Companies asking them to provide copies and evidence of their annual CPNI filings.”²¹ Lunex is aware, and the Enforcement Bureau’s own records will corroborate, that numerous companies in addition to the 666 listed in Appendix I received such Letters of Inquiry. These individual entity responses to the Enforcement Bureau’s Letters of Inquiry are not the subject of any “restricted” proceeding; nor are they subject to any confidentiality restrictions which the parties themselves have not voluntarily imposed.

The FCC’s NAL rules presuppose a single-party action (rather than an “omnibus” proceeding”);²² thus, those very rules preclude Lunex from participating in any of the 665 other Enforcement Files of the companies listed in the Appendix I. Lunex is nonetheless aware, however, through the non-confidential flow of information among industry parties, that certain entities which provided responses to the Enforcement Bureau’s Letters of Inquiry have not been named in Appendix I – and therefore are not presently facing forfeiture. This, even though certain of these parties provided explanatory statements to the Enforcement Bureau which were identical in

²¹ Omnibus NAL, ¶ 4.

²² See FCC Rule §1.80(f), every sub-element of which speaks to an NAL against a single *respondent*.

circumstance and defense to those expressed in LOI responses provided by other entities which *are* presently facing a \$20,000 forfeiture as a result of the Omnibus NAL.

This is a clear example of the impropriety of proceeding via an “omnibus” NAL. “[T]he Commission’s dissimilar treatment of evidently identical cases . . . seems the quintessence of arbitrariness and caprice.”²³ And “[i]f the agency makes an exception in one case, then it must either make an exception in a similar case or point to a relevant distinction between the two cases.”²⁴ Putting the best face on this dissimilarity of treatment of similarly-situated regulated entities, Lunex will acknowledge that the sheer magnitude of effort required for the Enforcement Bureau to adequately analyze every response it received to its mammoth LOI undertaking must have been immense. Perhaps, then, no intentional dissimilarity of treatment or result was actually intended by the Enforcement Bureau.

The LOIs went out to companies in September, 2008. Between then and the adoption and release of the Omnibus NAL on February 24, 2009, the Enforcement Bureau had approximately 180 days to receive in the informational responses, sit down and carefully analyze each one, consider the forfeiture policy factors as those factors would apply to each individual respondent’s circumstances, and then determine whether a forfeiture would be appropriate. Only after making such a determination would the Enforcement Bureau proceed to assign an appropriate forfeiture amount to each individual circumstance deemed to warrant forfeiture.²⁵

As noted above, it is a matter of industry knowledge that certain entities which received an LOI from the Enforcement Bureau have not been named in the Omnibus NAL. It is logical to assume that such entities provided informational responses to their respective LOIs, and that

²³ Colo. Interstate Gas Co. v. FERC, 850 F.2d 769, 774 (D.C. Cir. 1988).

²⁴ NLRB v. Washington Star Co., 7323 F.2d 974, 977 (D.C. Cir. 1984).

²⁵ Lunex notes that the uniform imposition of \$20,000 on each of the 666 Appendix I companies does not, on its face, appear to be the result of deliberate, individual forfeiture determinations by Staff.

following review the Enforcement Bureau determined forfeiture not to be appropriate. Potentially then, the Enforcement Bureau may have been required to undertake this individualized assessment with respect to thousands of LOI responses. Assuming for the sake of argument, however, that the Enforcement Bureau only received LOI responses from those 666 entities listed on Appendix I, and further assuming those informational responses started to come in to the Enforcement Bureau immediately, Staff would have had to resolve at least three LOI responses each calendar day in favor of forfeiture. Limiting analysis to only days in which the FCC was open for business, that number would more closely approach 5-1/2 resolutions in favor of forfeiture every day. And, of course, the Omnibus NAL was not the Enforcement Bureau's only active proceeding during that six-month window, further limiting Staff's availability for review of LOI responses.

As articulated by the Supreme Court, an

"agency must examine the relevant data and articulate a satisfactory explanation for its action including a rational connection between the facts found and the choice made. In reviewing that explanation, we must consider whether the decision was based on a consideration of the relevant factors and whether there has been a clear error of judgment."²⁶

Given the sheer magnitude of the effort necessary to hold 666 separate entities liable of rule violations severe enough to warrant the imposition of a forfeiture, it is a statistical certainty that errors have been made by the Enforcement Bureau in arriving at its Appendix I results. Indeed, the public record itself confirms as much: in at least one case an Appendix I company, fined a potential

²⁶ Motor Vehicle Mfrs. Assoc. v. State Farm Mut. Auto. Ins. Co., 463 U.S. 29, 43 (1983). The Supreme Court has further held that the agency decision "must not 'entirely fail[] to consider an important aspect of the problem,'" such as the circumstances more fully described in Section II.B.2 hereof. At present, neither the Enforcement Bureau nor the Commission as a whole has considered the unique difficulties facing prepaid telecommunications services providers such as Lunex or other companies which as a result of their particular service models oftentimes have no access to CPNI; and neither have as yet officially recognized that any efforts to file a §64.2009(e) annual certification under those circumstances would represent nothing more than the type of "mere nullity" which runs contrary to law and FCC precedent.

\$20,000 forfeiture for failure to file a §64.2009(e) annual certification²⁷ was issued *on the very same day* a second NAL imposing an apparent forfeiture of \$6,000. In this second NAL, the Chief of the Enforcement Bureau admits, “[o]n January 3, 2008, [the company] filed its annual CPNI certificate with the Commission.”²⁸

Through the instant Response to Omnibus NAL, Lunex repeats for the Enforcement Bureau the relevant matters set forth in the Company’s response to the LOI six months ago. That information makes clear that imposition of a proposed forfeiture against Lunex was inappropriate to begin with and must now be cancelled. Although an Enforcement Bureau decision canceling the proposed forfeiture would not eliminate the procedural infirmities and due process concerns raised by the Omnibus NAL, it would at least relieve Respondent from the specter of the financial harm of an unwarranted forfeiture. Indeed, no logical correlation exists between the financial harm the Enforcement Bureau seeks to visit upon Lunex and any harm caused to the FCC’s CPNI policies and consumer protection goals. In the instant case, such harm to CPNI policies and consumer protection goals is not merely negligible, it is nonexistent.

B. The Generic Conclusions Set Forth In the Omnibus NAL Are Impermissibly Broad and Inconsistent with the Underlying Purposes of Section 222 and the Commission’s CPNI Rules

1. The Enforcement Bureau Erred by Failing to Consider the Congressional Intent Underlying Section 222 and the History Of the FCC’s CPNI Rules

All 666 Appendix I companies are damaged by the Omnibus NAL’s cursory allegations because the Enforcement Bureau clearly has failed to consider the Congressional intent underlying Section 222 as a whole. Bearing these underlying purposes in mind is essential to reasoned decisionmaking here. Failure of the Enforcement Bureau to have done so renders the Omnibus

²⁷ Omnibus NAL, Appendix I, (“One Touch India, EB-08-TC-4014).

²⁸ In the Matter of One Touch India LLC Apparent Liability for Forfeiture, File No. EB-09-TG-137, (Feb. 24, 2009), ¶ 4.

NAL the precise form of “frenzied rhetorical excess” which “in light of the actual facts, appears to be so lacking in merit” and which “cannot but [be] view[ed] with considerable suspicion.”²⁹

The FCC’s CPNI proceeding was opened in 1996 “to implement section 222 of the Act, which governs *carriers’ use and disclosure of CPNI*.”³⁰ Prior to that time, however, CPNI-like regulations did exist and were applicable to only a small universe of entities – those deemed most capable of the anticompetitive use of highly sensitive information to disadvantage competitors. Specifically, in its Computer II, Computer III, GTE ONA and BOC CPE Relief proceedings, “[t]he Commission . . . adopted . . . CPNI requirements . . . to protect independent enhanced service providers and CPE suppliers from discrimination by AT&T, the BOCS and GTE.”³¹ Even these early CPNI-like regulations made a clear distinction between information which was deemed to pose no competitive threat (and, accordingly, the use of which was not restricted) -- aggregate data consisting of “anonymous, non-customer specific information.”³² The FCC was particularly

“cognizant of the dangers . . . that incumbent LECs could use CPNI anticompetitively, for example, to: (1) use calling patterns to target potential long distance customers; (2) cross-sell to customers purchasing services necessary to use competitors’ offerings (e.g., attempt to sell voice mail service when a customer requests from the LEC the necessary underlying service, call forwarding-variable); (3) market to customers who call particular telephone numbers (e.g., prepare a list of customers who call the cable company to order pay-per-view movies for use in marketing the LEC’s own OVS or cable service); and (4) identify potential customers for new services based on the volume of services already used (e.g., market its on-line service to all residential customers with a second line.”³³

²⁹ See WCWN Listeners Guild v. FCC, 610 F.2 838, 849 (1979).

³⁰ Third Report and Order, ¶ 5. Thus, from the very inception of Section 222, an entity such as Lunex, which has no access to CPNI – and which by necessary implication can neither use nor disclose CPNI, has not constituted the type of entity with which the CPNI rules is concerned.

³¹ In the Matter of Implementation of the Telecommunications Act of 1996: Telecommunications Carriers’ Use of Customer Proprietary Network Information and Other Customer Information, Implementation of the Non-Accounting Safeguards of Sections 271 and 272 of the Communications Act of 1934, as Amended, Second Report and Order and Further Notice of Proposed Rulemaking, 13 FCC Rcd. 8061 (1998) (“Second Report and Order”), ¶ 7.

³² Id., fn. 531.

³³ Id., ¶59.

With the Telecommunications Act of 1996, “Congress . . . enacted section 222 to prevent consumer privacy protections from being inadvertently swept away along with the prior limits on competition.”³⁴ While a “fundamental objective” of Section 222 was “to protect from anti-competitive conduct carriers who, in order to provide telecommunications services to their own customers, have no choice but to reveal proprietary information to a competitor,”³⁵ the FCC also made explicitly clear a central concept from which it has never waived: CPNI must be protected because it “consists of highly personal information.”³⁶ Indeed, the FCC has confirmed that the presence of such individually identifiable information is the essential characteristic of CPNI:

“Aggregate customer information is defined separately from CPNI in section 222, and involves collective data ‘from which individual customer identities have been removed.’ . . . aggregate customer information does not involve personally identifiable information, as contrasted with CPNI.”³⁷

In 1998, the FCC identified

“[t]hree categories of customer information to which different privacy protections and carrier obligations apply – individually identifiable CPNI, aggregate customer information, and subscriber list information. . . . Aggregate customer and subscriber

³⁴ *Id.*, ¶ 1. Even within the context of the earlier Computer II, Computer III, GTE ONA and BOC CPE proceedings, however, “CPNI requirements were in the public interest because they were intended to protect legitimate customer expectations of confidentiality regarding individually identifiable information.” In the Matter of Implementation of the Telecommunications Act of 1996: Telecommunications Carrier’s Use of Customer Proprietary Network Information, Notice of Proposed Rulemaking (“CPNI NPRM”), ¶ 12.

³⁵ In the Matter of Brighthouse Networks, LLC, et al, Complainants v. Verizon California, Inc., et. al, Defendants, Memorandum Opinion and Order, 23 FCC Rcd. 10704 (1998), ¶ 22. *See also*, In the Matter of Implementation of the Telecommunications Act of 1996: Telecommunications Carriers’ Use of Proprietary Network Information and other Customer Information; Implementation of the Non-Accounting Safeguards of Section 271 and 272 of the Communications Act of 1934, As Amended, 2000 Biennial Regulatory Review – Review of Policies and Rules Concerning Unauthorized Changes of Consumers’ Long Distance Carriers; Third Report and Order and Third Further Notice of Proposed Rulemaking, 17 FCC Rcd. 14860 (2002) (“Third Report and Order”), ¶ 131 (“We reaffirm our existing rule that a carrier executing a change for another carrier ‘is prohibited from using such information to attempt to change the subscriber’s decision to switch to another carrier.’”)

³⁶ *Id.*, ¶ 61.

³⁷ *Id.*, ¶ 143.

list information, unlike individually identifiable CPNI, involve customer information that is not private or sensitive . . . ”³⁸

Furthermore, the FCC has emphasized

“[t]he CPNI regulations in section 222 are largely consumer protection provisions that establish restrictions on carrier use and disclosure of personal customer information. . . . Where information is not sensitive, . . . the statute permits the free flow or dissemination of information beyond the existing customer-carrier relationship [W]here privacy of sensitive information is by definition *not* at stake, Congress expressly *required* carriers to provide such information to third parties on nondiscriminatory terms and conditions.”³⁹

Yet even as it has admonished carriers that CPNI must be scrupulously protected, the FCC has never required them to take action which would be unnecessary to the Agency’s enunciated privacy protection goals. Indeed, the FCC has explicitly informed carriers that they need not comply with aspects of the CPNI rules in situations where such rules would have no logical effect; *i.e.*, where no danger of anticompetitive use of individually identifiable personal information is possible:

“Moreover, to the extent carriers do not choose to use CPNI for marketing purposes, or do not want to market new service categories, they do not need to comply with our approval or notice requirements.”⁴⁰

Unlike the Enforcement Bureau’s attempt to impose the §64.2009(e) annual certification requirement upon all companies (regardless of whether any CPNI is possessed or used, and without regard to whether a company is subject to Title II⁴¹), the FCC’s exercise of restraint within the context of the CPNI approval and notice requirements constitutes a valid exercise of administrative authority which is consistent with the dictates of Lynch v. Tilden Produce Co. and its progeny.⁴²

³⁹ Id., ¶ 3.

⁴⁰ Id., ¶ 236.

⁴¹ The only exercise of Title I ancillary jurisdiction noted in the *EPIC CPNI Order* apparently being the inclusion of providers of interconnected VoIP services within scope of 64.2009(e).

⁴² See p. 24, infra.

The FCC has stated that its CPNI rules represent “a careful balancing of harms, benefits, and governmental interests.”⁴³ And a review of the overall history of the CPNI proceeding reveals this to be the case. As Commissioner Robert McDowell has observed, “our rules should strike a careful balance and should also guard against imposing over-reaching and unnecessary requirements that could cause unjustified burdens and costs on carriers.”⁴⁴ The Omnibus NAL, unfortunately, because it focuses exclusively on a single aspect of a single rule sub-part without considering the fuller history and purposes of the CPNI rules, falls far short of achieving the type of balanced result that the FCC has always sought (and until the Omnibus NAL has achieved) with respect to the application of its CPNI rules.

2. The Enforcement Bureau Erred By Imposing §64.2009(e) Liability Upon Entities Which Have No Access to CPNI

In the Omnibus NAL, the Enforcement Bureau places much emphasis upon Section 222’s “general duty on all carriers to protect the confidentiality of their subscribers’ proprietary information,”⁴⁵ going so far as to characterize “protection of CPNI” as “a fundamental obligation of all telecommunications carriers as provided by section 222 of the Act.”⁴⁶ Lunex does not disagree that the protection of highly personal individual information may indeed be a fundamental obligation of all telecommunications carriers which actually possess such information. The Omnibus NAL altogether fails to consider – prior to imposing blanket liability upon 666 companies – whether those companies even pose a risk of CPNI disclosure (which they do not) and, if not, whether any logical basis can be found for requiring the filing of the 64.2009(e) annual certification (which there is not).

⁴³ *Third Report and Order*, ¶ 2.

⁴⁴ *IP-Enabled Report and Order* Statement of Commissioner Robert M. McDowell, p. 1.

⁴⁵ Omnibus NAL, ¶ 2.

⁴⁶ *Id.*, ¶ 1.

Specifically referencing the 2006 actions of “companies known as ‘data brokers’”⁴⁷ as a result of which in 2007 “the Commission strengthened its privacy rules with the release of the *EPIC CPNI Order*,”⁴⁸ the Enforcement Bureau identifies the sole focus of the Omnibus NAL – the single sub-element of §64.2009 which directs companies to file for the first time in March, 2008, an officer’s certification “explaining how its operating procedures ensure that it is or is not in compliance with the rules in th[e entire] subpart”⁴⁹ of §64.2009. In assessing identical forfeitures upon each of the 666 Appendix I companies⁵⁰ the Enforcement Bureau looks no farther than to determine whether an annual certification was filed (although forfeiture has also been imposed, apparently, for failure to file on or before the March 1, 2008 deadline). The inquiry which the Enforcement Bureau has not made – and one which is critical to its determinations – is whether any of these entities actually had an obligation to make that filing. In many cases, such as Lunex’s, the answer to that question is a clear no:

Section 64.2009(a) deals with the implementation of a system which will establish a customer’s CPNI approval *prior to use*.⁵¹ As noted above, the FCC has held that the CPNI rules relating to use of CPNI apply only to carriers which choose to use customer CPNI.⁵² Section 64.2009(a) falls into the same category, *i.e.*, applicable only when CPNI will be *used*. Thus, a company like Lunex, which does not have access to CPNI because its particular service model does

⁴⁷ Id., ¶ 3.

⁴⁸ Id.

⁴⁹ As demonstrated in the following section, this requirement in and of itself is of particular concern to prepaid service providers (or any business model pursuant to which the provider does not have access to CPNI); a number of the FCC’s CPNI rules generally have no applicability to such a service model and the FCC has never suggested that it expects entities to undertake a regulatory action which would only be a nullity with respect to itself. See Section III, *infra*.

⁵⁰ At different points in the Omnibus NAL, the Enforcement Bureau bases such forfeiture upon the alternate, and inconsistent, theories of failure to file and also failure to file timely – certainly both situations cannot apply to a single entity; this is yet another example of why use of an Omnibus NAL was ill-considered.

⁵¹ 47 C.F.R. §64.2009(a).

⁵² See p. 14, *supra*.

not require such data, §64.2009(a) is a nullity and, as addressed in Section III following, is thus inapplicable to it.

Section 64.2009(b) directs carriers to train their personnel “as to when they are and are not authorized to use CPNI” and further demands the establishment of “an express disciplinary process in place.”⁵³ In the case of a company which does not have access to CPNI, there is need for neither training nor discipline. The reason is simple: without access to CPNI, there will never be a situation where CPNI use will be authorized and there will never be the necessity of disciplinary action since an employee cannot inadvertently reveal information which is not in his or her possession. Nonetheless, owing to the Enforcement Bureau’s near-fanatical approach to enforcement of §64.2009(e), the public record in EB Docket No. 06-36 demonstrates that numerous such companies have taken the purely superfluous steps of (i) developed training programs (which can do little more than educate employees concerning the operation and scope of the CPNI rules, since these employees will never come into access of individually identifiable customer CPNI) and (2) instituting a disciplinary process which will never need to be used. Like §64.2009(a), §64.2009(b) is also a nullity with respect to companies which do not have access to CPNI.

Likewise, §64.2009(c) deals with the retention of records of “all instances where CPNI was disclosed or provided to third parties, or where third parties were provided access to CPNI.”⁵⁴ Inasmuch as one cannot disclose or reveal information which it does not have, §64.2009(c) is also a nullity with respect to companies such as Lunex.

Section 64.2009(d) deals with supervisory review of “outbound telemarketing situations.”⁵⁵ For any carrier which cannot identify individual customers from its internal information (the essence

⁵³ 47 C.F.R. §64.2009(b).

⁵⁴ 47 C.F.R. §64.2009(c).

⁵⁵ 47 C.F.R. §64.2009(d).

of “CPNI”), outbound telemarketing is not a possibility.⁵⁶ For example, Lunex’s prepaid services may be utilized by any purchaser or authorized user to utilize Lunex’s services from any phone; *i.e.*, any telephone number. Lunex does not issue bills to purchasers and thus does not possess any CPNI which would ordinarily be contained in a presubscribed customer’s bill; indeed, a purchaser of Lunex’s services need not even supply his or her name at the point of purchase. Where outbound telemarketing is not a possibility, §64.2009(d) is a nullity.

And §64.2009(f), the only remaining sub-element other than the annual certification itself, directs carriers to provide written notice to the Commission “of any instance where the opt-out mechanisms do not work properly.” Here, again, customers have no need to “opt-out” when they have provided no individually identifiable CPNI to a carrier, and §64.2009(f) is a nullity in such circumstances.

Thus, for any company which by virtue of its particular service model does not have access to CPNI, the totality of §64.2009 has no practical application. And, as explained in Section III, the single filing obligation of the section, embodied in §64.2009(e), is of no effect against such an entity. To the extent any of the 666 Appendix I companies is within this category, whether it is a provider of prepaid services, a wholesale provider serving only other carriers, a provider of services utilizing exclusively LEC billing services, or which for any other reason does not have access to CPNI, the proposed forfeiture of the Omnibus NAL must be cancelled in its entirety.

The necessity of such cancellation is most clearly illustrated in the case of a prepaid services provider. As the Commission has noted, “to the extent CPNI is property, we agree that it is better

⁵⁶ Indeed, §64.2009(d) would have no application to any carrier which does not possess CPNI, such as providers of service on a purely wholesale basis to other carriers, or carriers which exclusively utilize LEC billing mechanisms [The FCC has held that BNA is *not* CPNI; *Second Report and Order*, ¶ 97 (“Unlike BNA, which only includes information necessary to the billing process, CPNI includes sensitive and personal information.”)]

understood as belonging to the customer, not the carrier”⁵⁷ and “the customer has the right to control when a carrier uses, discloses, or permits access to its CPNI.”⁵⁸ Within the context of prepaid services, this ability of the customer to control use, disclosure and/or access to CPNI is absolute and inviolate. Purchasers and authorized users of prepaid calling cards effectively guarantee that their CPNI will not be subject to misuse or unintentional release because they do not provide CPNI to the prepaid provider.

The Common Carrier Bureau (now Wireline Competition) recognized a decade ago that provision of a prepaid calling card service is not an activity which will result in the passing to the carrier of the type of highly personal and, therefore sensitive, information with which the Commission’s CPNI rules are concerned. Specifically, “[t]he Common Carrier Bureau determined that BellSouth’s prepaid calling card did not violate section 271 because, *inter alia*, (1) the Card did not involve a continuing, presubscribed relationship that would allow BellSouth to gain meaningful information about Card purchasers. . . .”⁵⁹ The Bureau continued:

“In fact, under the circumstances of its Card offering, BellSouth gains little meaningful customer information about the purchasers and users of the Cards. To place calls with a Card, the customer need only purchase it from the sales outlet of her choice, dial the Card’s service platform and enter the Card’s unique access code Thus, the Card generally does not permit BellSouth to gather information such as the customer’s identity and address; nor does it permit BellSouth to learn which carriers may provide the customer’s local or other (particularly presubscribed) long-distance service.”⁶⁰

And, as the Enforcement Bureau is aware,

“Section 222 (f)(1) defines CPNI as ‘information that relates to the quantity, technical configuration, type, destination, and amount of use of a

⁵⁷ *Second Report and Order*, ¶ 43.

⁵⁸ *Id.*, ¶183.

⁵⁹ See, e.g., *AT&T Corp. v. US West Communications, Inc.*, 16 FCC Rcd. 3574, fnnt 46, citing *AT&T Corp. v. BellSouth Corp. Memorandum Opinion and Order*, 14 FCC Rcd. 8515 (Com. Car. Bur. Mar. 30 1999)

⁶⁰ *Bureau Releases First Decision in Highly Successful ‘Rocket Docket’ AT&T’s Complaint Against BellSouth Denied*, 14 FCC Rcd. 8515, DA 99-609, Report No. 99-100 (March 30, 1999), ¶ 23.

telecommunications service *subscribed to* by any customer of a telecommunications carrier, and that is made available to the carrier by the customer solely by virtue of the carrier-customer relationship.”⁶¹

Like purchasers of the BellSouth card described above, Lunex’s customers do not “subscribe to” the Company’s services; they merely purchase those services, and do so without the need to provide any CPNI. Thereafter, Lunex’s services may be utilized by the purchaser or any authorized user designated by the purchaser, and further, those services may be utilized from any telephone, by any authorized individual. A significant benefit to consumers of prepaid services is the convenience provided by the inherently mobile nature of the services and the ability of the purchaser to share the right to use the services with individuals of their choosing. Because of these two factors, all information which may be available to Lunex as a result of its provision of service will always fall into the category of aggregate customer information because it does not involve personally identifiable information. Thus, a prepaid services provider such as Lunex poses absolutely no risk to the achievement of the FCC’s CPNI policies and goals. To fine such an entity \$20,000 for failure to timely file a certification mandated by an FCC rule which has no application to it – especially when the Company advised the Enforcement Bureau of all the above facts a full six months prior to issuance of the Omnibus NAL – is clear error.

III. THE ENFORCEMENT BUREAU IS PRECLUDED AS A MATTER OF LAW FROM IMPOSING LIABILITY UPON LUNEX STEMMING FROM SECTION 64.2009(e)

As explained more fully below, Lunex is not subject to the annual certification filing obligation of §64.2009(e). The Company does not have access to CPNI and thus is outside the scope of entities upon which the bulk of the FCC’s CPNI rules have any application. Notwithstanding the inapplicability of the filing requirement, however, Lunex responded promptly to the Enforcement Bureau’s inquiry as to whether the Company had satisfied this inapplicable

⁶¹ CPNI NPRM, ¶ 8.

requirement. Furthermore, the Company undertook efforts -- unnecessary, wasteful of resources and of no enhancement to the FCC's policy of protecting highly personal consumer information from misuse or inadvertent release -- to thereafter satisfy the unreasonable expectation of the Enforcement Bureau that even companies not logically -- or legally -- subject to the filing requirement must nonetheless find some way to file. Thus, as an initial matter, the Omnibus NAL's generic conclusion that Lunex "fail[ed] to submit an annual customer proprietary network information ('CPNI') compliance certificate"⁶² is clearly erroneous and must be set aside.

It is also patently incorrect, as demonstrated in Section IV, supra., that Lunex violated "section 222 of the Communications Act of 1934, as amended (the 'Act')"⁶³. On the contrary, Lunex's business model ensures to the point of absolute certainty that the Company is incapable of violating the confidentiality precepts embodied in Section 222 (and is not subject to the remainder of Section 222's requirements dealing with such matters as mandatory exchange of information among carriers to initiate service, directory publishing, etc.)

Finally, as to the sole remaining allegation of the Omnibus NAL, it is also clearly false that Lunex has violated FCC rules by "not fil[ing] compliance certifications on or before March 1, 2008, for the 2007 calendar year."⁶⁴ As demonstrated below, Lunex was not required to make this filing -- either before or after March 1, 2008, and any and all efforts undertaken by Lunex to pacify the Enforcement Bureau through filings in Docket No. 06-36 have been made on a purely voluntary basis.

Furthermore, prior to receipt of the LOI in September, 2008, there was no logical means by which Lunex could have concluded that the Enforcement Bureau expected it to make the March 1, 2008 certification filing. Indeed, the public statements of the Enforcement Bureau up to that date

⁶² Omnibus NAL, ¶ 1.

⁶³ Id., ¶4.

⁶⁴ Id.

actually led Lunex (and apparently a number of the other 665 Appendix I companies) to the opposite conclusion. On January 29, 2008, the Enforcement Bureau released a Public Notice regarding the upcoming first application of §64.2009(e) which required the filing of the Annual Officers Certification and Policy Explanation with the Commission.⁶⁵ In that document, the Enforcement Bureau reiterated the purpose of the CPNI certification requirement – to strengthen the Commission’s existing privacy rules. Toward that end, the annual certification filing represented an additional “safeguard[] to provide CPNI against unauthorized access and disclosure.”⁶⁶ The Enforcement Bureau then specifically informed the public that the new requirement is applicable to “all companies subject to the CPNI rules.”⁶⁷ Thus, the Enforcement Bureau informed the entire telecommunications industry of its position that only companies for whom the CPNI rules have any application – which at a logical minimum would require such companies to have access to CPNI, were expected to make this upcoming filing.⁶⁸

The Enforcement Bureau even went so far as to provide a “suggested template that filing entities may use to meet the annual certification requirement.”⁶⁹ Even a cursory review of the Enforcement Bureau’s “template” would have been sufficient to demonstrate to any company such

⁶⁵ “Public Notice – EB Provides Guidance On Filing of Annual Customer Proprietary Network Information (CPNI) Certifications Under 47 C.F.R. § 64.2009(e)”, DA 08-171 (January 29, 2008).

⁶⁶ Id., p. 1.

⁶⁷ Id.

⁶⁸ See NARUC v. FCC, 533 F.2d 601 (1976), *fn* 15:

“The language of the Commission, referring to ‘access programming’ and ‘turn the dial,’ shows that the FCC is talking about educational, governmental, public and leased channels changing programming. None of these rules, all video transmissions, is at issue here. The two-way, point-to-point services were not mentioned and their nature makes it impossible to infer that the FCC language was dealing with them by implication.”

Likewise, the Enforcement Bureau’s public statements make it impossible to infer by implication that companies which have no access to CPNI were caught up in the annual certification filing; indeed, quite the opposite is true.

⁶⁹ Id.

as Lunex, which has no access to CPNI, that this is a filing requirement which is of no application to it. In fact, any attempt by Lunex to file such a certification would represent nothing more than an exercise in wasted effort, the precise form of “practical nullity” which the FCC has always eschewed.⁷⁰

Ultimately, however, even if the Enforcement Bureau’s statements to the industry which led directly to the conclusion that companies such as Lunex are not subject to the annual certification filing requirement of §64.2009(e), it would still be precluded from applying that annual filing requirement, or imposing a forfeiture, upon Lunex here. Application of that filing requirement to a company which has no access to CPNI goes beyond the bounds of “practical nullity”; it is, in fact, an actual nullity:

“The power of an administrative officer or board to administer a federal statute and to prescribe rules and regulations to that end is not the power to make law, for no such power can be delegated by Congress, but the power to adopt regulations to carry into effect the will of Congress as expressed by the statute. A regulation which does not do this, but operates to create a rule out of harmony with the statute, is a mere nullity. Lynch v. Tilden Produce Co., 265 U.S. 315, 320-322, 44 S.Ct. 488, 68 L. Ed. 1034; Miller v. United States, 294 U.S. 435, 439, 440, 55 S.Ct. 440, 79 L.Ed. 977, and cases cited. And not only must a regulation, in order to be valid, be consistent with the statute, but it must be reasonable. International R. Co. v. Davidson, 251 U.S. 506, 514, 42 S.Ct. 179, 66 L.Ed. 341. The original regulation as applied to a situation like that under review is both inconsistent with the statute and unreasonable.”⁷¹

The annual certification requirement of §64.2009(e) might indeed be consistent with the Congressional intent of Section 222 generally under some circumstances; furthermore, requiring companies which pose an actual risk to consumer privacy to make this certification may be

⁷⁰ In the Matter of Southern Pacific Communications Company Revisions to Tariff F.C.C. No. 6, 67 FCC2d 1569, Transmittal No. 113, ¶18: “A tariff must be rejected if it is a ‘substantive nullity’ such as where the carrier, as a practical matter, cannot provide the service described in the tariff.” Similarly, an annual certification filing would be a substantive nullity where, as a practical matter, the company cannot pose a risk to the FCC’s consumer privacy protections because the company has no individually identifiable personal information to misuse or inadvertently reveal.

⁷¹ Manhattan General Equipment Co. v. Commissioner of Internal Revenue, 297 U.S. 129, 134-135, 56 S.Ct. 397, U.S. 1936.

reasonable. However, requiring entities *which possess no access CPNI* – and therefore (i) could not possibly pose the identified risk of potential misuse or unintentional release of individually identifiable personal information, (ii) could not possibly experience data broker actions; (iii) could not possibly experience customer-initiated CPNI complaints – to file the annual officer's certification coupled with an explanation of how the entity has taken steps to comply with FCC CPNI rules (which only have real, rather than purely theoretical, application to an entity which *does* possess access to CPNI) can by no means be considered either “consistent with the statute” or “reasonable”.

IV. LUNEX HAS NOT VIOLATED SECTION 222 OF THE ACT, §64.2009(e) OF THE COMMISSION'S RULES OR THE *EPIC CPNI ORDER*

The Omnibus NAL asserts that the 666 Appendix I companies, including Lunex, are in apparent violation of (i) Section 222 of the Act; (ii) §64.2009(e) of the Commission's rules, and (3) the Commission's *EPIC CPNI Order*. With respect to Lunex, each of these assertions is inaccurate and must be set aside. Lunex has violated no provision of Section 222 and it is not subject to the provisions of §64.2009 or those ordering provisions of the *EPIC CPNI Order* implementing the annual certification filing requirement of sub-part §64.2009(e).

As noted above, the Omnibus NAL, which in the aggregate seeks to impose \$13,200,000 in apparent liability for forfeiture, does so without any consideration whatsoever of whether any of the 666 Appendix I companies has done any actual harm to the FCC's CPNI policies in general or to any consumer in particular. Rather, the Omnibus NAL imposes upon each Appendix I company a “knee-jerk”, uniform \$20,000 forfeiture, ostensibly for failure to file a §64.2009(e) certification.⁷² In Lunex's case, this allegation is simply untrue. Lunex has filed a §64.2009(e) certification for calendar year 2007 – and the record in EB Docket No. 06-36 demonstrates that numerous of the other 665 Appendix I companies have done the same.

⁷² Omnibus NAL, ¶¶ 1, 4.

After twice asserting the Appendix I companies have “failed to file” the §64.2009(e) certification, the Omnibus NAL asserts as a separate violation that certain of the Appendix I companies “failed to §64.2009(e) certification on or before March 1, 2008.”⁷³ On this point as well, the Omnibus NAL is incorrect; Lunex has not violated §64.2009(e) by failing to timely file an annual certification. Lunex’s §64.2009(e) certification, attached hereto as Exhibit A, was indeed filed on September 18, 2008. However, as noted above, Lunex was under no legal obligation to file the certification at any date -- prior to, on, or after -- March 1, 2008. And Lunex’s EB Docket 06-36 certification filing for both calendar years 2007 and 2008 have been made on a purely voluntary basis; thus, the date of those filings is entirely irrelevant.

The above allegations are the totality of the charges made against Lunex (and the other 665 Appendix I companies); both allegations are false, both must be rescinded and, the proposed forfeiture against Lunex must be cancelled in its entirety.

V. APPLICATION OF THE FACTORS SET FORTH IN THE FCC’S FORFEITURE POLICY STANDARDS MANDATE THE CANCELLATION OF THE OMNIBUS NAL AGAINST LUNEX

As demonstrated above, Lunex is not liable for forfeiture in any amount because the Company has not violated Section 222 of the Act, §64.2009(e) or the *EPIC CPNI Order*. However, the Company is mindful that any argument not advanced in this Response may be lost to it and therefore, it addresses below the factors from the FCC’s *Forfeiture Policy Standards* which the Enforcement Bureau is obligated to take into account: “the nature, circumstances, extent, and gravity of the violation and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require.”⁷⁴ By addressing these factors herein, Lunex does not concede that any amount would be appropriate as a forfeiture; this

⁷³ Id., ¶4.

⁷⁴ 47 U.C.S. §503(b).

analysis is provided only out of an abundance of caution to ensure that the Company's Response to the Omnibus NAL is deemed complete in every respect.

The FCC has stated that "[t]he mitigating factors of Section 503(b)(2)(D) will . . . be used to make adjustments in all appropriate cases."⁷⁵ Those remainder of the factors, all of which support a downward adjustment of the proposed forfeiture amount, are addressed here.

None of the factors which the FCC considers most significant to retention of a proposed forfeiture in its original amount (or in truly serious situations possibly elevating the amount of a forfeiture) are at issue here.⁷⁶ Even in the case of a company which is subject to the §64.2009(e) annual certification filing requirement, the filing itself is a mere ministerial act. Failure to strictly meet a March 1st filing deadline can hardly be considered "egregious misconduct". Furthermore, the FCC considers whether the amount of any forfeiture is necessary in order to constitute a "relative disincentive" to repeating rule violations in the future. UWT, which complied with §64.2009(e) as an initial matter (and which has also submitted CPNI certification covering calendar year 2008) needs no incentive to comply with FCC rules -- the Company has *voluntarily* complied with a rule which has no legal application to it.

However, in today's economy, no company can afford to spend money needlessly and Lunex cannot rationally justify the expenditure of \$20,000 when it has not violated any FCC rule. Thus, there is an element of "inability to pay" in the instant situation; Lunex would be hard-pressed to find an explanation acceptable to its auditors if it were to make such an unjustified -- and unjustifiable -- payment.

⁷⁵ *Forfeiture Policy Statement*, ¶ 53.

⁷⁶ *See Forfeiture Policy Statement*, Adjustment Criteria for Section 503 Forfeitures ("Upward Adjustment Criteria: (1) egregious misconduct; (2) ability to pay/relative disincentive; (3) intentional violation; (4) substantial harm; (5) prior violations of any FCC requirements; (6) substantial economic gain; (7) repeated or continuous violation.")

As noted above, public statements of the Enforcement Bureau affirmatively led Lunex to the conclusion that it was not expected to make a §64.2009(e) filing. Accordingly, the possibility of “intentional violation” of an FCC rule is not present here.⁷⁷ And, with respect to the issue of “substantial harm”, Lunex has clearly demonstrated herein that the Company has caused no harm to the FCC’s CPNI policies and no harm to any consumer.

Lunex has never received a warning or an admonishment from the FCC. Furthermore, since the filing obligation addressed in the Omnibus NAL arose only for the first time in March, 2008, there is no possibility that Lunex is guilty of a prior violation of §64.2009(e). Neither Lunex nor any other entity stands to reap a “substantial economic gain” from refusal to timely fulfill a ministerial §64.2009(e) filing obligation; and inasmuch as the Omnibus NAL was issued prior to the second annual §64.2009(e) filing deadline, no entity – including Lunex – can be guilty of a repeated violation thereof.

Each of the factors which the FCC considers relevant to a *downward* adjustment of a proposed forfeiture is, however, present here.⁷⁸ And each of those factors weigh heavily in favor of a significant reduction in the proposed forfeiture, up to and including reduction of the forfeiture from a monetary fine to a mere warning or admonishment. As noted above, Lunex, like many of the other 665 Appendix I companies, ultimately made a §64.2009(e) filing obligation for calendar year 2007. Thus, even if the Company had been required to make this filing, doing so only after the March 1, 2008, filing deadline would constitute at most a “minor violation” – a fulfillment of an obligation, albeit tardy, but still a fulfillment. As to “good faith” and “voluntary disclosure”, even now, consistent with the legal principles addressed above, that the §64.2009(e) filing obligation cannot lawfully be imposed upon it. Thus, the voluntary filing of Lunex’s calendar year §64.2009(e)

⁷⁷ Indeed, no violation of an FCC rule is present here at all – intentional or otherwise.

⁷⁸ See *Forfeiture Policy Statement*, Adjustment Criteria for Section 503 Forfeitures (“Downward Adjustment Criteria: (1) minor violation; (2) good faith or voluntary disclosure; (3) history of overall compliance; (4) inability to pay.”)

filing – as well as the voluntary filing of a similar certification covering calendar year 2008 – demonstrate a good faith attempt to satisfy the Enforcement Bureau *voluntarily made*.

Staff is directed by §503 to also consider “such other matters as justice may require.”⁷⁹ Thus, the Enforcement Bureau should bear in mind the following as it considers application of the forfeiture factors to Lunex’s situation. Lunex has a history of overall compliance with FCC rules and regulations and, as demonstrated below, the Company is unable to satisfy the proposed forfeiture amount without imposing needless costs that will have to be recovered in some way, whether by reducing staff, service response or otherwise. From its very inception, the Company has tried diligently to comply with all FCC rules and regulations.

Furthermore, the Company commenced operations as an extremely small entity and remains so at the present time. Without the deep pockets of a larger, established firm, Lunex does not have the financial ability to routinely engage telecommunications legal counsel on purely ministerial matters. Thus, while the Company took such compliance actions which were reasonably available to it, the more esoteric elements of the FCC’s complex and sometimes confusing operating procedures may have occasionally escaped it. This is probably most evident with respect to the Company’s reliance upon the Enforcement Bureau’s advice through Public Notice. Given what appeared to be clear advice that the Company was not expected to make the §64.2009(e) filing, Lunex did not delve further into the precise text of Section 222 and §64.2009(e).⁸⁰

Upon receipt of the Enforcement Bureau’s Letter of Inquiry, the Company fully and candidly responded with relevant information sufficient to put the matter to rest. Nevertheless, the Company took the additional further step – on a purely voluntary basis -- of filing a §64.2009(e)

⁷⁹ 47 U.C.S. §503(b).

⁸⁰ Even had it done so, however, that text could not reasonably have put the Company on notice that it should make a filing which appeared facially inapplicable to it.

certification in order to assure the Enforcement Bureau that there had been no data broker actions and no customer CPNI-related complaints during calendar year 2007.

Pursuant to FCC Rule §1.3, the FCC may waive any rule for good cause shown.⁸¹ Thus, even if Lunex were legally subject to §64.2009(e) (which it is not), the interests of justice surely would have supported a waiver of the rule under the above circumstances. Furthermore, the FCC has held that “warnings can be an effective compliance tool in some cases involving minor or first time offenses. The Commission has broad discretion to issue warnings in lieu of forfeitures.”⁸² Exercise of that discretion, rather than imposition of a forfeiture, would certainly have been the appropriate course of action for the Enforcement Bureau in this case.⁸³

Accordingly, Lunex respectfully requests that the Enforcement Bureau cancel in its entirety the proposed forfeiture against Lunex or, at a minimum, convert the proposed forfeiture into a mere admonishment or warning, thereby alleviating any risk of financial harm to the Company.

CONCLUSION

By reason of the foregoing, Lunex Telecom, Inc., hereby respectfully requests that the Enforcement Bureau cancel the proposed \$20,000 forfeiture against it, dismiss the Omnibus NAL in its entirety (or reduce it to a mere admonishment against Lunex), terminate proceeding File No. EB-

⁸¹ 47 C.F.R. §1.3.

⁸² *Forfeiture Policy Statement*, ¶31. See also 47 C.F.R. §1.89.

⁸³ Indeed, so strong is the FCC's commitment to this policy of issuing only warnings to first time violators that it has stated its intent to apply the practice “except in egregious cases involving harm to others or safety of life issues.” *Forfeiture Policy Statement*, ¶23.

08-TC-4503, cancel the proposed \$20,000 forfeiture against Lunex in its entirety or, at a minimum, severely reduce the forfeiture as set forth above.

Respectfully submitted,

Catherine M. Hannan

RE: File No. EB-08-TC-4503

Dear Mssr. Somers and Mesdame Greene:

I am writing in response to a letter dated September 5, 2008, directed to Lunex Telecom, Inc. ("Lunex Telecom"), from the FCC Enforcement Bureau ("Letter of Inquiry"). In response to this letter, Lunex Telecom hereby responds as follows.

Lunex Telecom did not file an Annual CPNI Certification covering year 2007 because the company had a reasonable belief it was not required to do so based on the nature of services it provided. Lunex Telecom believed it did not maintain, possess, or have access to Customer Proprietary Network Information ("CPNI") during 2007, because the vast majority of the company's customers are users of international prepaid calling cards and the company does not have a general policy of associating unique personal identification information of its users with the users' Call Detail Records ("CDRs") within its database.

In general, Lunex Telecom sells prepaid calling card services to a transient public. As such, it is generally not Lunex Telecom's practice to obtain or keep the name, address, or other personal identifying information of the users of its calling card services. Lunex Telecom occasionally becomes aware of such personal identifying information when a card user contacts the company seeking a replacement card, in which case Lunex Telecom will obtain the customer's name and address for mailing purposes. Lunex Telecom also occasionally obtains such information when customers purchase calling cards through the Internet, but this information is primarily used to process a credit card transaction.

Lunex Telecom's switch does record Call Detail Records ("CDRs"). However, as described above, it is not Lunex Telecom's general policy to associate these CDRs with personal identifying information. Instead, Lunex Telecom generally maintains CDR data in the aggregate. As such, Lunex Telecom reasonably believed that it did not maintain, possess, or have access to CPNI during 2007 and for this reason did not file a CPNI Certification for 2007.

Section 222 of the Communications Act defines CPNI as follows -

(h) Definitions

As used in this section:

(1) Customer proprietary network information

The term "customer proprietary network information" means—

- (A) information that relates to the quantity, technical configuration, type, destination, location, and amount of use of a telecommunications service subscribed to by any customer of a telecommunications carrier, and that is made available to the carrier by the customer solely by virtue of the carrier-customer relationship; and
- (B) information contained in the bills pertaining to telephone exchange service or telephone toll service received by a customer of a carrier; except that such term does not include subscriber list information.

(2) Aggregate information

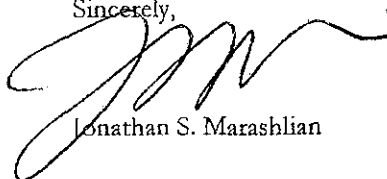

The term "aggregate customer information" means collective data that relates to a group or category of services or customers, from which individual customer identities and characteristics have been removed. (emphasis added)

Lunex Telecom interprets the highlighted language as setting forth the principal that in order for CDRs to constitute CPNI, the CDRs must be associated with a uniquely identifiable customer that is "subscribed to" the services of a telecommunications carrier. As a prepaid calling card provider, Lunex Telecom does not have "subscribers" and Lunex is generally unaware of the names or other personal identification information of its "users."

In short, based on its review the statute and regulations Lunex Telecom reasonably believed it did not maintain or have access to CPNI in 2007 and it concluded the CPNI Certification filing was not applicable. Despite this reasonable belief, Lunex Telecom has since undertaken a comprehensive review of its internal policies, practices and procedures with respect to Section 222 and the Commission's Regulations and has concluded that, if it did possess CPNI, the Company did in fact comply with all substantive requirements throughout 2007. Lunex Telecom has since belatedly filed a copy of its CPNI Certification and Statement of Compliance in Docket No. 06-36. See Attachment 1.

Should you have any questions regarding this matter, please do not hesitate to contact the undersigned.

Sincerely,

Jonathan S. Marashlian

2008 Annual 47 C.F.R. §64.2009(e) CPNI Certification for 2007

Date Filed: September 18, 2008

Name of Company Covered
by this Certification: Lunex Telecom, Inc.

Form 499 Filer ID: 824368

Name of Signatory: Dat T. Lu

Title of Signatory: President

I, Dat T. Lu, certify that I am an officer of the company named above and acting as an agent of the above-named company, that I have personal knowledge that the company has established operating procedures that are adequate to ensure compliance with the Commission's CPNI rules. See 47 C.F.R. §64.2001 *et seq.*

Attached to this certification is an accompanying statement explaining how the company's procedures ensure that the company is in compliance with the requirements set forth in section 64.2001 *et seq.* of the Commission's rules.

The company has not taken any actions (proceedings instituted or petitions filed by a company at either state commissions, the court system, or at the Commission) against data brokers in the past year. The company has no information to report with respect to the processes pretexters are using to attempt to access CPNI.

The company has not received any customer complaints in the past year concerning the unauthorized use of CPNI.

Signed: _____

**2008 Accompanying Statement to
Annual 47 C.F.R. § 64.2009(e) CPNI Certification for 2007**

To the extent Lunex Telecom, Inc. receives or obtains access to CPNI, it has implemented the following practices and procedures with respect to the use, marketing, and disclosure of such CPNI:

Employee Training and Discipline

- Train all employees and personnel as to when they are and are not authorized to use CPNI.
- Institute an express disciplinary process for unauthorized use of CPNI.

Sales and Marketing Campaign Approval

- Guarantee that all sales and marketing campaigns are approved by management.

Record-Keeping Requirements

- Establish a system to maintain a record of all sales and marketing campaigns that use their customers' CPNI, including marketing campaigns of affiliates and independent contractors.
- Ensure that these records include a description of each campaign, the specific CPNI that was used in the campaign, and what products and services were offered as a part of the campaign.
- Make certain that these records are maintained for a minimum of one (1) year.

Establishment of a Supervisory Review Process

- Establish a supervisory review process for all outbound marketing situations.
- Certify that under this review process, all sales personnel obtain supervisory approval of any proposed outbound marketing request for customer approval.

Opt-In

- Guarantee that the Company only discloses CPNI to agents, affiliates, joint venture partners, independent contractors or to any other third parties only after receiving "opt-in" approval from a customer.
- Verify that the Company enters into confidential agreements with joint venture partners, independent contractors or any other third party when releasing CPNI.

Opt-Out Mechanism Failure

- Establish a protocol through which the Company will provide the FCC with written notice within five (5) business days of any instance where opt-out mechanisms do not work properly, to such a degree that consumers' inability to opt-out is more than an anomaly.

Compliance Certificates

- Execute a statement, signed by an officer, certifying that he or she has personal knowledge that the company has established operating procedures that are adequate to ensure compliance with the FCC's CPNI regulations.
- Execute a statement detailing how operating procedures ensure compliance with CPNI regulations.
- Execute a summary of all customer complaints received in the past year concerning unauthorized release of CPNI.

Customer Authentication Methods

- Institute customer authentication methods to ensure adequate protection of customers' CPNI. These protections only allow CPNI disclosure in accordance with the following methods:
 - Disclosure of CPNI information in response to a customer providing a pre-established password;
 - Disclosure of requested CPNI to the customer's address or phone number of record; and
 - Access to CPNI if a customer presents a valid photo ID at the carrier's retail location.

Customer Notification of CPNI Changes

- Establish a system under which a customer is notified of any change to CPNI. This system, at minimum, notifies a customer of CPNI access in the following circumstances:
 - password modification,
 - a response to a carrier-designed back-up means of authentication,
 - online account changes, or
 - address of record change or creation.

Notification to Law Enforcement and Customers of Unauthorized Access

- Establish a protocol under which the appropriate Law Enforcement Agency ("LEA") is notified of any unauthorized access to a customer's CPNI.
- Ensure that all records of any discovered CPNI breaches are kept for a minimum of two (2) years.

Declaration of Dat T. Lu

I, Dat T. Lu, am President of Lunex Telecom, Inc. I verify, under penalty of perjury, that the information contained herein is true and accurate to the best of my knowledge, information, and belief. I further verify that all of the information requested by the letter dated September 5, 2008, directed to Lunex Telecom, Inc. from the FCC's Enforcement Bureau ("Letter of Inquiry") that are in the company's possession, custody, control or knowledge have been produced.
